

Minchinhampton Market House.

Cleaning agreement for those trusted low impact hirers.

Low impact would be groups of adults, or youngsters that are under close supervision all the time for a short timed club/activity. Standing activities not using any furniture or tables. So in effect participants can easily enter and take part without touching any surface in the market house.

The following 3 points are the advice from our Covid trained cleaner Trish Simms.

1. Toilets are cleaned with bleach solution. And all touch points cleaned with bleach and water solution.
2. Touch points cleaned. Door handles elsewhere are cleaned using antibacterial wipes or hot soapy water. So as to avoid allergies to bleach solution. Entrance. Exit. Hallway doors. Toilet doors. Light switches.
3. Stair rail is wiped down using antibacterial wipes supplied. Again to minimise risk of reactions to bleach solution. In the case of a wish to not use the plastic in wipes hot soapy water will also render the virus inactive.

In these instances the kitchen is not to be used by hirers.

The hirer needs to provide a signed and dated copy of this document to the bookings secretary for the Market House (by hand, post or e-mail).

--

I/we agree to carry out the cleaning in accordance with the requirements set out above after every use of MMH facilities.
